

DECISION

Complaint No. : POS/TTA/251/2025

Name and address of the complainant : Mr. Ghulam Hussain Mirbahar,
R/o. Union Council Jaar, District Sujawal.

Name of the Agency Complained against : Local Govt. Department

Name & Designation of Investigating Officer : Mr. Haroon Ahmed Khan
Regional Director Thatta

Vetted by : Mr. Shahid Ahmed Hashmi,
Advisor Legal

Subject : **ALLEGED FAILURE TO REMOVE STAGNANT RAINWATER FROM THE VILLAGE OF THE COMPLAINANT.**

THE COMPLAINT:

Mr. Ghulam Hussain Mirbahar filed a complaint dated 23.10.2025 against Union Council, Jar District Sujawal, alleging their continued failure to remove stagnant rainwater that had accumulated at various locations in his village and adjoining areas following rainfall that occurred several months earlier. According to the complainant, the stagnant water had become a persistent source of inconvenience for local residents and a breeding ground for mosquitoes.

PROCEEDINGS:

2. The complaint was admitted under Section 10 of the relevant Act and forwarded to the concerned agency for comments.
3. The Agency, in its report dated 12.12.2025, denied the allegations and clarified that the rainfall had occurred three to four months earlier and that immediately after the cessation of rain, the Chairman along with his team visited the affected areas and personally supervised the dewatering process and removal of debris accumulated due to the rainfall. The agency further alleged that the complaint was motivated and amounted to blackmail.
4. A rejoinder was called for. The complainant refuted the contents of the agency's report and reiterated the allegations made in his original complaint.
5. For ascertaining the factual position, a hearing was scheduled on 26.01.2026. The complainant was not able to substantiate his allegations or identify any specific location where stagnant water was still present.

FINDINGS:

6. The record reflects that the rainfall occurred approximately three to four months ago, which temporarily resulted in water accumulation due to deficiencies in the sanitation system. However, it appears that the accumulated water was removed shortly after the rainfall ceased. Ordinarily, it is improbable for rainwater to remain stagnant for such an extended period, even if not promptly removed.

(2)

7. In the absence of supporting evidence or identification of any specific site where stagnant water persists, the complaint remains unsubstantiated.

DECISION:

8. In view of the foregoing, the complaint is hereby disposed of with the direction to the Secretary of concerned Union Council to ensure the maintenance of an effective sanitation system in the village so as to prevent future accumulation of rainwater in the streets or in front of residential houses.
